

e10 isoPOD™

The e10 isoPOD™ is a purpose built, portable, plug-&-play lubrication storage and dispensing system designed specifically for external dispensing of lubricants directly into critical assets and on-site machinery.

*Self Contained Lubricant
Storage & Dispensing System*

APPLICATION:

- Maintenance of Critical Assets
- On-Site Machinery
- Mining & Heavy Industry
- Oil & Gas Industry
- Maritime
- Food & Beverage Industry
- Portable Lubrication Storage

MAX PAYLOAD:

13,885 kg (30,611 lb.)

BUNDING CAPACITY:

1,540L (406 gal.)

EXTERNAL DIMENSIONS (mm):

2438W x 2991L x 2896H

PNEUMATIC REQUIREMENTS:

- Grease Pump Supply:
 - 8 BAR (120 PSI)
 - 110 LPM (3.8 CFM)
- Oil Pump Supply:
 - 8 BAR (120PSI)
 - 210LPM (7.5 CFM)

STORAGE CAPACITY:

2 x 1000L IBC (4 Max*)
or 8 x 205L Drums

DISPENSING CAPACITY:

4 x Heavy Duty Hose Reels with Digital
Metered Hand Guns

Standard Features

- Built in accordance with AS1940-2017
- Oil dispensing from standard 1000L IBC containers or 205L drums
- Grease dispensing from 205L drums
- ISO shipping container lockdown points
- Crane lifting lugs and forklift channels
- Finished in 2-Pak Polyurethane paint - white
- Heavy duty lockable doors
- Premium oil filtration & pneumatic pumps Included
- Filtered ventilation

*Max Capacity exceeds AS1940-2017 Bunding Volume
Delivered product may look different to digital renders
Pneumatic Air Supply not included

Optional Features

- Dispensing bay orientation
- Paint finish colours
- Internal and/or external lighting
- Fitted steel liquid tanks
- Waste oil evacuation systems
- External power connectivity
- Internal power points
- Solar power
- Remote volume level (capacity) metering
- OilSafe® lubricant oil containers

Advantages

- Plug-&-Play solution
- Best practice lubrication storage & dispensing of lubricants
- Easy transportation
- Secure and controllable access to valuable lubricants
- Fast implementation with minimal site preparation required
- Portability - moves when you need to move or expand your operation
