

THE LEADER IN VISUAL LUBRICATION SYSTEMS

LABEL SAFE® Fluid Identification from Bulk Storage to the Point of Use

Innovative, practical and durable these products are fully integrated & color-coded to form our patented Visual Lubrication System.

COMPONENTS AVAILABLE IN 10 COLORS:

LABEL SAFE is the only industrial grade labeling system in the world that enables accurate lubricant identification from bulk storage to the fill point. In the process providing:

- **5S** – color-coded, identification and order.
- **LEAN** – the right lubricant in the right fill point.
- **Right to Know** – ensuring operators are aware of what they are handling.

The patent pending fully integrated system is comprised of two core components:

- **Labels** – available in various sizes, styles and materials.
- **Label Holders** – many different types and combinations to address the challenges of securing labels in an industrial environment.

Innovative, practical and durable, this fully integrated and color-coded labeling system also:

- **Ensures** the right lubricant goes into the right machine every time.
- **Improves** OSHA compliance.
- **Accommodates** inclusion of MSDS information at all steps of the lubrication process.
- **Enables** consistent identification of bulk storage, intermediate containers and point of use.
- Is **flexible and suitable** for multiple workplace applications.
- Is **industrial grade, high quality** and suitable for outdoor use.
- **Improves** productivity and efficiency.
- **Increases** bottom line savings.

Customized & Standard Fluid Identification from Bulk Storage to the Point of Use

BULK STORAGE UNITS

The first step in the chain of custody. Ensuring that Lubrication Technicians can **clearly identify the lubricant they need**. Solutions range from simple adhesive labels through to solutions that include complete MSDS information.

TRANSFER CONTAINERS & LIDS

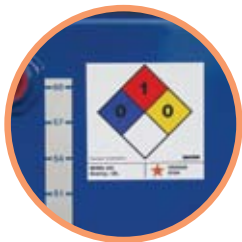

Cross contamination of lubricants can be just as damaging as dirt and water. **Match** the transfer container label to the bulk label to eliminate the potential for cross contamination and ensure that employee's Right To Know entitlements are addressed.

POINT OF USE

Getting the **right lubricant** into the **right fill point** (contaminant free) is one of the simplest ways to reduce maintenance and operating costs. **Matching** the container label to the fill point label is the final step.

Additional Uses

Labeling Bulk Storage

Labeling Drum Pumps

Labeling Grease Pails

Labeling Grease Guns

Labeling Grease Protection Tubes

ADHESIVE LABELS

Description

LABEL SAFE Adhesive labels are made of heavy duty Polyester and have a permanent adhesive. The label material can resist water and most lubricants. Apply to a clean flat surface for best long term adherence.

WATER RESISTANT PAPER

Description

With a paper-like texture enabling easy writing, these heavy duty labels have built-in protection against the rigors of industrial work places. Use with LABEL SAFE pockets and other label holding components for attachment to bulk storage, transfer containers and fill points.

LAMINATED CARD

Description

Similar to credit cards in size and weight, these highly durable cards are made for the toughest work environments. Over laminated for additional protection of printed information these cards can be fixed with a LABEL SAFE leash or with heavy duty double sided tape.

LABEL SIZE MATRIX

A variety of sizes to suit easy attachment of labels in the workplace.

SHAPE AND DIMENSION		APPLICATION	QUANTITY	WATER & TEAR RESISTANT	POLYESTER ADHESIVE	LAMINATED CARD
	2" x 3.5"	Popular and practical sized label that provides for detailed information and fits most labeling applications.	Sheet of 10	•	•	
	2" Circle	Ideal for GREASE SAFE Cartridge Protection Tubes or applications where a smaller space is available, yet detail is still useful.	Sheet of 12	•	•	
	3.25" x 3.25"	A larger label for areas where greater visibility is required.	Sheet of 6	•	•	
	0.5" Circle	Designed for LABEL SAFE Grease Fitting Protectors, and ID Tabs. These labels provide room for specific identification information.	Sheet of 180		•	
	0.5" x 5.5"	Curved to fit LABEL SAFE Color-Coded Drum Rings.	Sheet of 20		•	
	2.2" x 3.4"	Providing the same level of detail as the 2" x 3.5" labels, this size is unique to the laminated card labels.	Single Labels			•

STYLE	2" X 3.5"	2" CIRCLE	3.25" X 3.25"	DRUM RING	0.5" CIRCLE	2.2" X 3.4"

Pre-printed	Adhesive	Adhesive	Adhesive	Adhesive	Adhesive	Adhesive
Wizard	Adhesive & Water Resistant	Adhesive & Water Resistant	Adhesive & Water Resistant	Adhesive	Adhesive	Laminated Card
Custom	Available in all of these and many other sizes and materials.					

Evaluation Kit

Try LABEL SAFE today with this cost effective Evaluation Kit. Includes a cross-section of the products and information sheets to help you design the right labeling solution for your lubrication system.

Evaluation Kit

Part# 290001

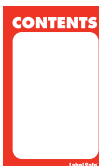

Contents Label: Adhesive

Available in 10 colors and 5 label sizes

These adhesive labels are made of heavy duty vinyl providing an oil and waterproof finish that can be applied to fluid containers, bulk storage devices and similar applications for practical color-coded identification.

Adhesive 2"x 3.5" Content - Red
Part# 282108

Contents Label: Paper

Available in 10 colors and 5 label sizes

Made of water & tear resistant paper these labels provide a durable label fit for industrial environments. Use with Label Pockets.

Paper 2" x 3.5" Content - Blue
Part# 280002

Pre-printed Labels: 0.5" circles

Available in 2 styles - many options

Weekly

Grease Fitting Protectors and ID Tabs have label recesses to support identification of lubricant fill points. Pre-printed label sheets, with 180 labels per sheet, are available to meet varying identification requirements.

Preprinted Labels - Weekly
Part# 900481

Fill Point ID Washer™

Available in 10 colors and 6 sizes

These washers are temperature and chemical resistant enabling color-coded identification of machine oil and grease fill points. Combine with various LABEL SAFE components to provide more detailed identification at or near the fill point.

1" Washer - Dk Green Part# 260003

ID Tab™

Available in 10 colors

ID Tabs provide durable labeling and fill point identification options when mated with a LABEL SAFE Fill Point ID Washer and a 0.5" label.

ID Tab - Yellow

Part# 205509

Grease Fitting Protector™

Available in 10 colors and 3 sizes

Available in 3 convenient sizes, LABEL SAFE Grease Fitting Protectors provide contamination protection and easier identification of grease fill points. Includes label recess and grip tab that enables simple removal and reuse — even when wearing gloves!

Grease Fitting Protector - 1/4" - Blue
Part# 291002

Protective Lens

These clear lens fit securely into the top of Grease Fitting Protectors and ID Tabs providing a protective cover over the 0.5" adhesive labels.

Lens

Part# 290999

Label Pocket Frame™

Available in 10 colors

Industrial grade frame protects and color-codes label pockets, connects to equipment via LABEL SAFE magnets, or attaches to OIL SAFE containers via LABEL SAFE Drum Rings.

Label Pocket Frame - Red
Part# 200008

Label Pocket™

Available in 2 sizes

Double-sided pocket accommodates Content Labels and card stock, and provides ample space for comprehensive identification information on containers and equipment. Available in larger size for MSDS and other information.

2" x 3.5" Label Pocket Part# 200101

Label Wrap™

Available in Removable or Bonded

Clear and durable label wrap enables secure attachment of labels using the small LABEL SAFE Pocket. Suitable for grease guns, auto-lubricators, air breathers, spray cans, and other suitably sized cylindrical objects. Option to include internal bonding tape to securely fix Label Wrap into position if required.

Wrap - Removable

Part# 206000

Drum Ring™

Available in 10 colors

LABEL SAFE color-coded Drum Rings fit around the neck of OIL SAFE containers and allow for an adhesive identification label to be fitted or a Label Pocket and label to be attached by Leash.

Drum Ring - Purple

Part# 207007

ID Washer Label Clamp™

ID Washer Label Clamp couples to any LABEL SAFE color-coded Fill Point ID Washer, enabling comprehensive equipment fill-point identification. Clamp in a label pocket and Label Pocket Frame, if desired.

Clamp

Part# 204001

Leashes

Available in 2 types

For attaching Label Pockets to machinery, piping and other fittings. Available in two types these leashes can be easily removed and reused. The Label Leash can be connected to other Label Leashes to create a longer leash.

Pocket Frame Leash
Label Leash

Part# 202002
Part# 202001

Label Magnet™

High strength, custom built Magnets fix Label Pockets and color-coded Label Pocket Frames to bulk fluid barrels, totes, storage racks, machinery, equipment, or any metal surface.

Magnet

Part# 203002

Swivel Joints™

Available in 2 types

Swivel Joints mate with LABEL SAFE Fill Point ID Washers and enable the adjustment of LABEL SAFE identification components to improve visibility or access to fill points.

Swivel ID Tab
