

Ultra Clean Capsule Dispenser Stand UC-CDS

Introducing the all new **Ultra Clean Capsule Dispenser Stand (UC-CDS)**. Clean Seal Capsules are now easily stored and dispensed with the Ultra Clean Capsule Dispenser Stand and dispensing tubes. The dispensers accommodate the entire range of Clean Seal Capsule sizes through 3 distinct dispensing tubes (UC-CD-1.5, UC-CD-2.5, & UC-CD-3.0). The dispensers are equipped with an attached lid to seal and protect the capsules from airborne contamination. The dispensing tubes can be fully configured into any position on the dispenser wall due to the hook and groove design. There is a magnetic strip to keep the dispensing tubes secured into position during capsule dispensing. The dispensers are also transparent, so the operator can visually see the remaining capsules inside of the dispensing tube. Labels with the capsule's part number/-size are provided for the dispensers to allow for easy capsule size identification. A laminated sizing chart with silhouettes will also be provided to help assist the operator to find the proper Clean Seal Capsule size for each type of fitting they are seeking to seal. The Ultra Clean Capsule Dispenser Stand comes with a useful loading wand to help load the initial capsules into the dispenser. Once the operator grabs a capsule from the dispenser a new capsule is simultaneously put into the ready position for easy repeated dispensing. The Ultra Clean Capsule Dispenser Stand's adjustable easel-like design allows to be applied to any bench top or may also be compacted for wall mounting. The Ultra Clean Capsule Dispenser Stand is easy to integrate into any production cell, hose shop, or warehouse setting.
