

# ***THE SCALABLE SOLUTION. LUSTOR™ LUBRICATION STORAGE SYSTEM.***

Best-in-class lubrication programs depend on the methods applied for storing, transferring and applying lubricants to your valuable equipment, and the first step to help ensure clean oil enters your equipment is to filter it to an acceptable level. Luster systems deliver the storage and dispensing benefits you trust, in cost-effective, compact and expandable units.

Designed to protect every liter of oil from on-site environmental conditions, Luster systems combine proper storage, filtration and identification to create an efficient and organized, workflow. This, in turn, ensures that your lubricants remain dry and contaminant-free before they enter your equipment; saving you time and money.

# LUBRICATION STORAGE SYSTEM

**WALL MOUNT  
(NO RESERVOIR)**

**65 GALLON (250 LITER)**

**130 GALLON (500 LITER)**

OilSafe® Luster™ Lubrication Systems are specially designed for individualized and expandable lube rooms. *(For constricted space, 130 Gallon (500 Liter) Systems are stackable.)*

Three different system configurations are offered to fit your application needs and requirements, these are:

- Wall Mount (no reservoir) for use with drum or tote - Part #LST0310
- 65 Gallon (250 Liter) - Part #LST2310
- 130 Gallon (500 Liter) - Part #LST5310

Features	Benefits
Impact resistant poly-tank and yellow aluminum plate	Compact & expandable
Pneumatic pumps (3:1 air/oil pump)	Cost-effective
3-way filtration (10-micron filter)	Organized & clean workspace
Oil consumption meter	Increases work environment safety
Auto shut-off dispensing tap	Prevents cross-contamination
Oil level indicator	Improves lubricant quality
Desiccant breather	Lowers lubricant & maintenance costs
Drip tray	Less equipment downtime
Drum transfer hose kit	Increases productivity
Drum adapter kit (w/ part #LST0310)	

### Optional Upgrades/Add-ons:

- Custom Fluid ID Label (for front of system)
- 3 or 20-Micron Filter
- Pneumatic 5:1 Pump
- Luster Spill Containment - Part #LSTSCP
- Colorized Quick Connects
- IBC Spill Pallet

To further minimize cross-contamination when storing and transferring lubricants, match your Luster system with a dedicated OilSafe Color-Coded Transfer Container; Drum and Lid, Drum Label Kit and Fluid Identification Label.
