

**TRAIN  
WITH  
US.**

# BASICS OF LUBRICATION

This training session provides a basic level of theoretical lubrication information delivered by a lubrication expert from Lubrication Engineering covering the basics of:

- Lubrication fundamentals
- Storage & dispensing
- Lubricant transfer
- Contamination management
- Lubrication equipment
- Principles of application
- Oil Sampling & analysis
- Best practice processes.

Who should attend:

- New lubrication technicians
- Facility technicians
- Condition Monitoring Personnel
- Maintenance technicians
- Maintenance management
- Purchasing.

Course duration: 4 hrs

Price: \$1,200 per course.

# BEST PRACTICE LUBRICATION

This training session is a level up on the Basics of Lubrication and provides more advanced theoretical lubrication information delivered by a lubrication expert from Lubrication Engineering covering:

- Lubrication fundamentals
- Storage & dispensing
- Lubricant transfer
- Contamination management
- Lubrication equipment
- Principles of application
- Oil Sampling & analysis
- Best practice processes.

Who should attend:

- New lubrication technicians
- Facility technicians
- Condition Monitoring Personnel
- Maintenance technicians
- Maintenance management
- Purchasing.

Course duration: 1 Day

Price: \$2,400 per course.

# ADVANCED LUBRICATION

A combination of hands-on and advanced theoretical training delivered by a lubrication expert from Lubrication Engineering covering:

- Lubrication theory, selection and application
- Lube storage, handling and contamination management
- Lubrication & reliability maintenance strategies
- Lubrication health monitoring
- Advanced lubrication best practice.

Who should attend:

- Lubrication champions
- Lubrication technicians
- Maintenance technicians
- Maintenance team leaders
- Reliability engineering
- Maintenance engineering.

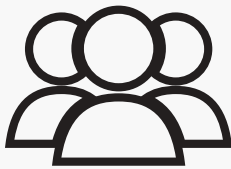

Course duration: 3 days

Price: \$4,800 per course.

## TERMS & CONDITIONS

**UP TO 20  
PEOPLE**

**BUSINESS  
HOURS**

**ON-SITE  
OR OFF-SITE**
