Endpoint
Providing Visibility to Autolubers

GREASEBOSS
Lubricate with confidence.

GreaseBoss Endpoint is the world's first endpoint monitoring hardware and software system that provides near real time visiblity over auto-lubrication systems

II01 Improve Autoluber Performance

Detect common autoluber issues before they occur - empty grease canisters, flat batteries, broken hoses
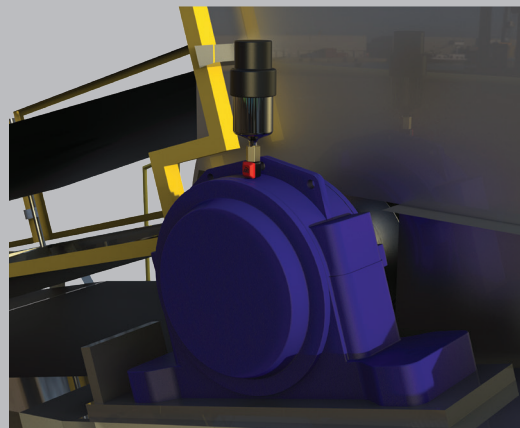

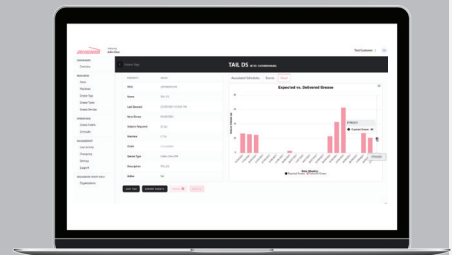

II02 *Monitor Grease Consumption*

Ensure your autolubers are performing as your expect. Monitor actual grease delivered vs target volumes, all accessible through the GreaseCloud

II03 Simple Installation

Quick and simple installation onto any autoluber system under 5000 psi rating. Start tracking your autolubers in minutes

Endpoint
Providing Visibility to Autolubers

**GREASEBOSS**
Lubricate with confidence.

GreaseBoss gives you visibility over how much grease was applied and when it was applied. The GreaseBoss Endpoint gives you the ability to remotely monitor and manager your autolubrication systems like never before.

MONITOR & MANAGE

GreaseBoss keeps a **unified** record of all greasing in your plant - manual and autolubricators.

GreaseBoss ensures greasing is completed to the OEM spec, protecting your interests on warranty claims
