

The Track & Trace of Machinery Lubrication

GreaseBoss is a hardware & software product that ensures industrial machinery is greased correctly. GreaseBoss augments your team and reduces the potential for costly mistakes.

SIMPLICITY

Simply fit the GreaseBoss Head Unit to your existing grease guns

Install Grease Tags to the grease points in the plant

Access the GreaseCloud at greasecloud.io and start tracking your equipment lubrication today

// 01 Improve Equipment Reliability

GreaseBoss ensures your machinery receives the right grease, at the right time in the right volume

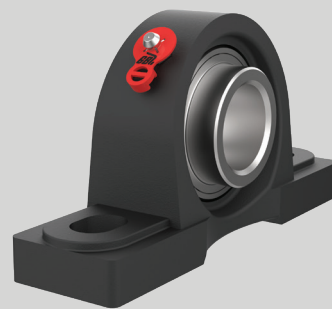

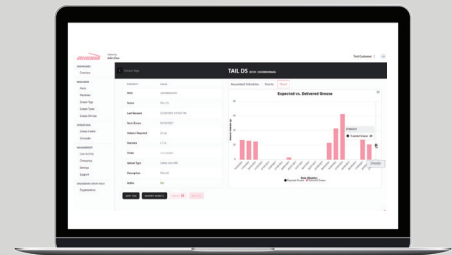

// 02 Reduce Maintenance Costs

GreaseBoss reduces your spend on unnecessary labour and parts for avoidable grease related machine failures.

// 03 Increase Safety

GreaseBoss reduces exposure to dangerous work environments by reducing grease related machine failures.

The Track & Trace of Machinery Lubrication

The GreaseBoss starter kit consists of a head unit with integrated sensor hose and 50 Quick fit grease tags. We recommend one head unit for each type of grease used on site. The software license, set up and support of the GreaseCloud for the first three months is included with each starter kit.

COMPLIANCE

GreaseBoss keeps a unified record of all greasing in your plant - manual and autolubricators.

GreaseBoss ensures greasing is completed to the OEM spec, protecting your interests on warranty claims
