

# LUBRICATION ENGINEERING PARTNERS WITH DROPSA AUSTRALIA

We would like to announce, DropsA Australia Pty Ltd has a new home with Lubrication Engineering Pty Ltd.

Rodney Fitzpatrick, Managing Director of Lubrication Engineering, aims to expand the DropsA product solutions to meet customer needs and enhance the current products and services of Lubrication Engineering Pty Ltd.

Designed and manufactured in Europe, DropsA have a long history of delivering the latest advanced technology to maximise productivity and longevity of your equipment.

*"Working together we will offer customers a comprehensive solution for all their automated lubrication system requirements."*

*"We're excited about this new opportunity for DropsA Australia customers. They will have a national sales, distribution and dedicated technical team focusing on delivering best practice solutions for lubrication."*

DropsA Australia's National Product Manager, Jeff Albert has overseen the relocation to a larger purpose-built warehouse and office facilities with Lubrication Engineering. The new address is Unit 1D, 201 Power Street, Glendenning NSW 2761.

This move will enable future growth, allowing us to continue to provide our customers with exceptional service.

## Lubrication Engineering:

Lubrication Engineering Pty Ltd is an Australian Owned family business, specialising in asset reliability and lubrication solutions with over 45 years' experience. Providing customers with a holistic approach including consulting, auditing, lubrication solutions and training. Supported with experienced sales and technical teams focused on improving customers safety, cost reductions and efficiencies in the mining, oil and gas, shipping, marine, defence force, commercial construction, food and beverage, automotive, and renewable energy sectors.

Understanding every site has different challenges, the Lubrication Engineering team collaborates and identifies the solutions based on the site requirements including lubrication, contamination management and automated lubrication equipment.
