AUTOMATIC LUBRICATION SYSTEMS

INTRODUCING DROPSAVET

DropsaVET is the new mobile lubrication systems division of DropsA specializing in providing optimal products, application knowledge and install-services for mobile machinery.

The division comprises of an expert team combining over a hundred years' experience located in Apeldoorn in the Netherlands.

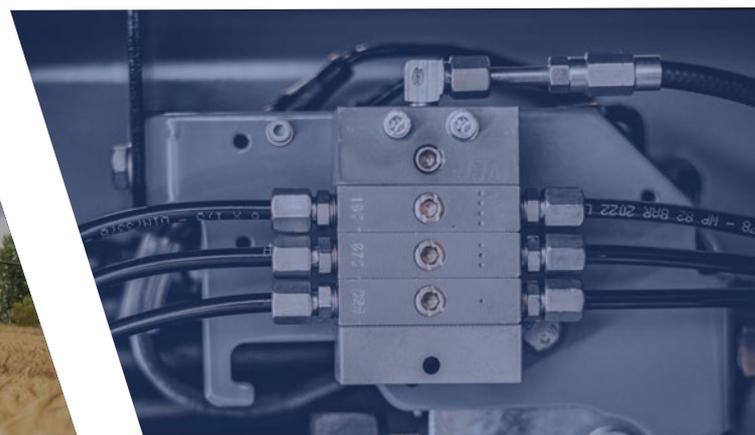

DropsaVET's objective is to assist the world-wide DropsA network of companies, distributors, and customers with their extensive knowledge of mobile systems to bring to the market the best mobile-optimized products, training, and installation services.

We have listened to the needs of the market and put together the world's best team of mobile lubrication experts.

The facility in Apeldoorn also boasts a training academy with mock-up equipment. Engineers can attend certification courses in system design and installation. This includes both theoretical and field training and is essential to guarantee high-quality installation standards for mechanics and partners.

Our supply program includes all the major lubrication-types (including Progressive, Single Line, Dual Line, Chain) with innovative IoT connectivity and smart diagnostics developed on the back of tried and tested technology.

DropsA is a worldwide leader in lubrication technology operating 16 locations directly and a network of specialized distributors. The DropsaVET mobile division is our commitment to get the best team and command a leadership position in this exciting market.

AUTOMATIC LUBRICATION SYSTEMS

DropsaVET is a supplier of progressive automatic lubrication systems specialized for on- & offroad applications. Due to high quality standards, our products provide solutions for various applications in the following market segments:

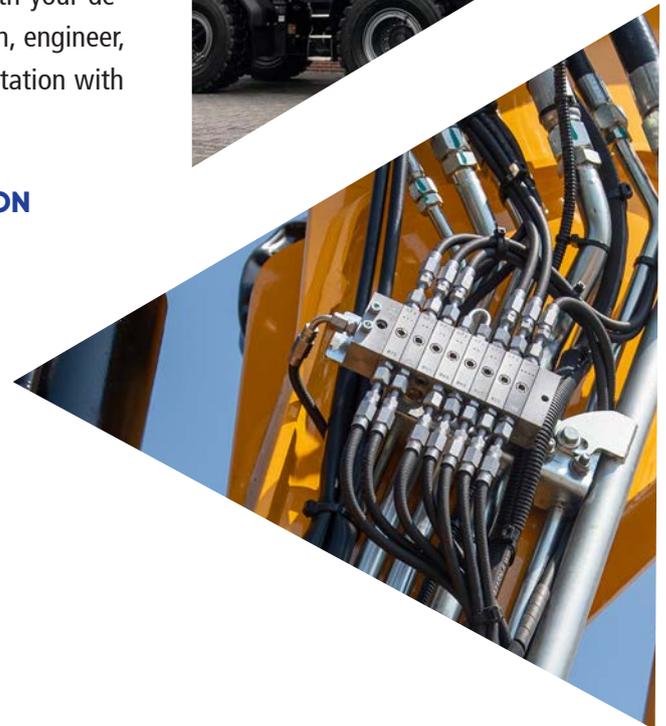

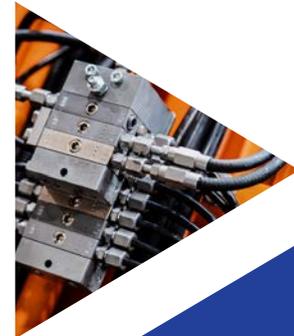

-  Agricultural & Forestry
-  Earth moving & Construction
-  Transport & Logistics
-  Port Equipment
-  Maritime
-  Recycling & Material handling
-  Aviation industry / GSE
-  Offshore industry
-  Mining
-  Wind energy

DropsaVET stands out through its production of cost-effective, high quality items. Our product selection spans from grease nipples to complete systems. Whether you require a lubrication system for a trailer, machinery, or an entire factory, we are well-equipped to provide the precise solution you seek, thanks to our broad expertise and product lineup.

In cases where a standard product does not completely align with your demands or requirements, we are prepared to collaboratively design, engineer, and manufacture the appropriate custom solution in close consultation with our clients.

BENEFITS OF THE DROPSAVET AUTOMATIC LUBRICATION SYSTEMS

-  Compatible with both 2-grease and 0-grease
-  Standard low level notification
-  Self-venting
-  Stirring paddle in reservoir prevents separation of the grease
-  Reliable progressive system not sensitive to malfunctions
-  Professional installations by experienced service technicians
-  Service network with worldwide coverage

PRODUCTS

BRAVO 4

The BRAVO 4 pump is a robust and sturdy electric grease pump. The heavy-duty design makes it ideal for applications in harsh environments which require high quality and reliability. The BRAVO 4 is specifically designed for on- and offroad equipment. By combining a proven design with new connectivity functions, Drop-A VET brings automatic lubrication to the 21st century.

FEMTO

The FEMTO pump is a compact, robust electric grease pump with versatile multi-outlet capabilities. This makes it extremely suitable for applications in tight spaces. It integrates multiline and progressive technology within its small housing, offering 8 multiline and 2 progressive outlets for lubrication. It is adaptable with modular design, optional timer unit, smart IO controls, and is available in various configurations to meet client requirements.

COMPACT

The BRAVO COMPACT Grease Pump is an industry-leading solution with a compact, heavy-duty design, setting a new standard for space efficiency. As the smallest pump in its class, it's perfect for applications with limited space. This versatile pump accommodates up to 3 pump elements and offers options for internal timers, smart OI controls, or control unit-free operation. Never worry about grease levels with the built-in minimum level sensor. Additionally, it integrates seamlessly with other equipment and systems through CAN-bus functions. With its robust design and feature-rich capabilities, the BRAVO COMPACT Grease Pump is the ideal choice for efficient and space-saving lubrication in various industrial settings.

NPZ

The NPZ Progressive metering dividers offer a compact design, perfect for precise grease lubrication in tight spaces. Specifically crafted for heavy equipment and trailers, they dispense accurate lubrication via progressive piston movement. The AISI 316 version enhances durability for corrosive environments. Years of expertise is translated into a reliable product.

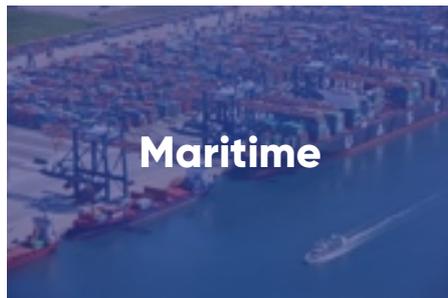

SMX

Experience the SMX/SMO Modular Lubrication Dividers: Combining precision and modularity for efficient lubrication across a variety of industrial applications, it's the ultimate solution for scalable, reliable lubrication systems.

MARKET SEGMENTS

DropsaVET is a leading provider of advanced lubrication systems, offering installations and maintenance services for various industries. Our expertise and precision lubrication solutions are tailored to meet the unique needs and challenges of each of these sectors. DropsaVET is dedicated to enhancing equipment performance, increasing operational efficiency, and extending the lifespan of critical machinery across a wide range of applications.

With a commitment to innovation and excellence, DropsaVET is the trusted partner for lubrication systems in the following industries:

INSTALLATION AND SERVICE

At DropsaVET, we take care of the installation and maintenance of your systems; at the end customer's premises or at your own location. We are very flexible in this area. We provide maintenance for every brand of lubrication system and have a large stock.

DropsaVET will make sure that all the equipment provided is correctly installed.

This means you can benefit from:

-  The best possible service
-  The highest quality
-  Independent and tailor-made advice
-  Training including associated documentation for the installation to enable you to do your own maintenance
-  Complete installation by Wiejelo Equipment
-  Best price-quality ratio

SERVICE

Naturally, DropsaVET also guarantees the provision of the services you need once the lubrication system has been installed.

QUALITY AND BUILD

DropsaVET knows better than anyone else that the assembly quality of an lubrication systems is essential. DropsaVET only has installation work done by experienced and specially trained technicians with extensive experience in this sector. In this way we ensure that the technicians doing the installation have the necessary experience so that it can always be done properly.

Equipment used in earthmoving and construction and recycling and transshipment runs day and night, seven days a week. Because of intensive use, equipment is put under a lot of strain and has to endure a lot, with lubrication points in vulnerable locations.

We know better than anyone, that the installation quality of lubrication systems on this equipment is essential. Our experienced technicians are specialised in the installation of these systems in the most difficult to reach locations.

DropsaVET works with most manufacturers, so the lubrication systems can be installed during manufacturing, and the equipment can be commissioned immediately after delivery.

SYSTEM MONITORING

DROPSA.APP

A new generation of lubrication devices is here: smart, adaptive to operating conditions, and able to self-diagnose, helping to provide you with predictive maintenance and maximize your uptime.

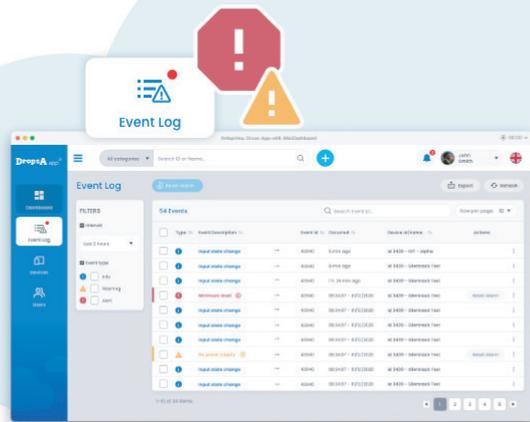

Stay informed about performance, levels, and pressure with our intuitive dashboard. Easily schedule refills and maintenance operations based on real-time feedback.

Efficient Event Management

Troubleshoot effortlessly with our comprehensive event log. Track user changes and monitor historical data to pinpoint potential issues.

Detailed Device Insights

Drill down into device operations with our detailed dashboard. Stay informed about status and events for quick troubleshooting.

Streamlined Device Control

Manage devices effortlessly with our intuitive console. Share devices with others and update configurations remotely.

Efficient Group Organization

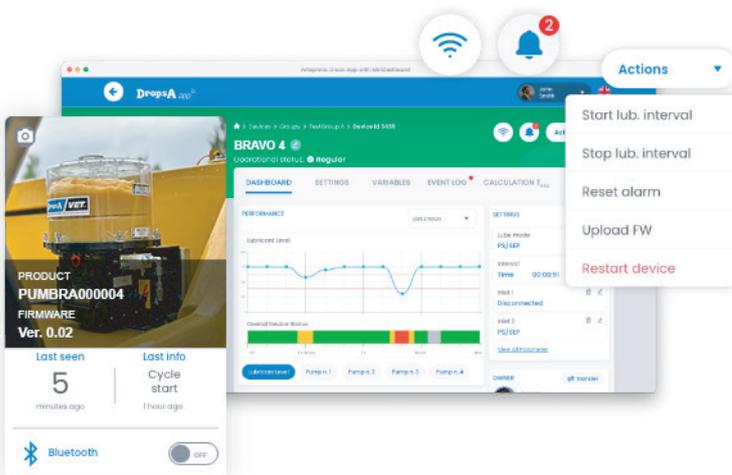

Group devices for aggregated monitoring, simplifying maintenance efforts.

Seamless User Access

Share device access with ease. New users receive automatic invitations to access shared devices.

Enhanced Functionality with Cycle Sensor Integration

Our system can be augmented with a cycle sensor, which monitors the operation of the lubrication system, ensuring optimal functionality.

DropsA

VET ACADEMY

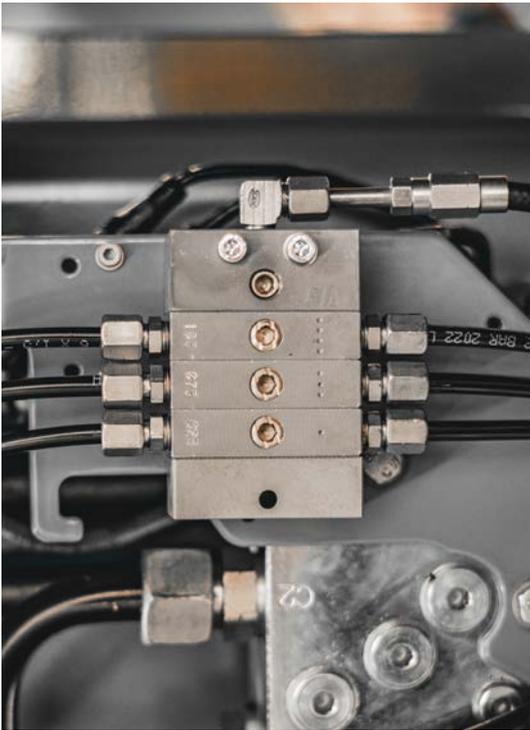

DROPSAVET ACADEMY

DropsaVET boasts a dedicated training facility at its headquarters in Apeldoorn, The Netherlands. The DropsaVET Academy serves a distinct purpose: to equip dealers, OEM personnel, and installation engineers with specialized skills for both on and off-road applications. Rooted in extensive experience within the on and off-road markets, the facility provides a comprehensive platform for honing expertise.

The academy hosts a wide array of applications, enabling trainees to immerse themselves in the intricacies of heavy machinery installations. In addition to hands-on practical courses, we offer theoretical training options. These encompass sales techniques, operational dealership procedures, and technical proficiency. This holistic approach ensures that participants receive a well-rounded education, empowering them to excel in their respective roles within the industry.
